**NOTICE OF CONSTRUCTION
CITY OF MILPITAS
McCANDLESS WELL PROJECT NO. 7076**

Dear City Residents and Businesses near McCandless Drive,

The City of Milpitas will be starting construction of a potable ground water well to supplement water supply. The well and pump station will be located in the future McCandless Park adjacent to the recently completed Mabel Mattos Elementary School (Map Attached).

Construction Noise & Lighting Impacts and Working Hours: The level of sound generated by the well drilling and installation activities is expected to be similar to other on-going construction activities within the area. The drilling operations and construction work will require 24-hour continuous operation for approximately 14 to 21 days until the well bore hole is complete. To mitigate potential construction noise and work lighting at night, the Contractor will install temporary sound barriers around the work site.

Traffic Impacts: Construction equipment will enter and exit the site at the McCandless Drive project entrance near East Penitencia Creek. Vehicles and equipment may enter the site at different times requiring minor traffic delays.

Questions: If you have project questions, please contact Vibha Deshmukh, City Project Manager, at (408) 586-3357, or Michael Silveira, CIP Manager, at (408) 586-3303.
